

Running Against the Clock to Finish the Dream!

The ***Sprint to Victory Project*** has met its goal of \$1.5 million in cash and pledges to replace our football field turf at Sid Cichy Stadium and build an 8-lane track for our track team. Thank you to all who made this first goal possible. Now comes the final push to turn this track and turf project into the best field complex possible for our students. Facilities do matter. Now football, track, and soccer athletes will have the very best.

We want to share with you the work we still need to do to fully complete both of these projects. After meeting with architects and engineers and inviting bids for our turf and track projects we now have the final cost numbers to make this project fully complete and 100% paid for!

Beyond Turf and Track - The Final Fundraising Goal

After all bidding was completed for this project, we have determined the necessary equipment to make the track, a fully equipped track program. We have evaluated the bids for the turf to create the highest quality, longest lasting field with all the needed enhancements for safety and playability for football and soccer athletes, and for all physical education students. To add all of the necessary equipment for turf and track will cost \$1.9 million bringing the total project cost to \$3.4 million dollars. With a total of \$2.1 million in our expansion fund it leaves us with a \$1 million goal in cash and pledges to raise by 9/30/23.

The Necessary Extras

The additional funds to be raised cover the following:

- Moving existing lighting and adding new lighting for both the turf and track.
- New drainage systems/materials needed after turf is moved to extend turf life.
- Upgrading turf covering to extend turf warranty from 10 years to 12+ years.
- Creating a track surface that increase track life from 10 to 20 years of use.
- Providing the necessary finishing landscaping of both track and turf when completed.
- Purchasing all needed track equipment to create a full competitive track program including(nearly \$400,000):
 - » High and low hurdles
 - » Pole vaulting pits, poles and related equipment.
 - » Long jumping pits and related equipment
 - » Throwing equipment for discus, shotput, and javelin.
 - » Starting blocks, timing and measuring equipment.
 - » Dry storage facilities for all track, soccer, and turf equipment.
- Purchasing new soccer goal modules that will be compatible with the new turf.
- Purchasing turf field maintenance equipment to care for the turf and extend its life beyond the 12 year warranty!
- Drainage engineering for city zoning requirements including a retention pond for field drainage.
